
Cap, 100 Hz: designs along all optimisation paths
S0: sinc, start uniform
X0: exact, start uniform
XS: exact, start sinc optimum
SX: sinc, start exact optimum
SR: sinc, start paper quadvel-rad
XR: exact, start paper quadvel-rad
six paper designs
sinc optimum
exact optimum
predicted = true
exact two-sided power change vs uniform (dB)
sinc-model power change vs uniform (dB)
